

PROGRAM OBJECTIVES

Applied Bachelor in Aircraft Maintenance Management (ABAMM) Program

The Applied Bachelor in Aircraft Maintenance Management (ABAMM) Program Educational objectives (POs) are derived from Abu Dhabi Polytechnic's mission and are measured through a related set of Student Outcomes (SOs). The stated POs for the ABAMM are:

PO1: Provide curriculum in Aviation Maintenance that generates graduates having competencies in the maintenance and repair of modern aircraft

PO2: Engage students with teamwork experiences while demonstrating effective communication skills and knowledge of related contemporary issues

PO3: Provide students with quality education incorporating current technologies to prepare them for professional development and advanced studies in aircraft maintenance or a related area

PO4: Foster professional and ethical environment to instill personal responsibility for continuous professional development and life-long learning
